Security Activity Book!

EDITION  
1

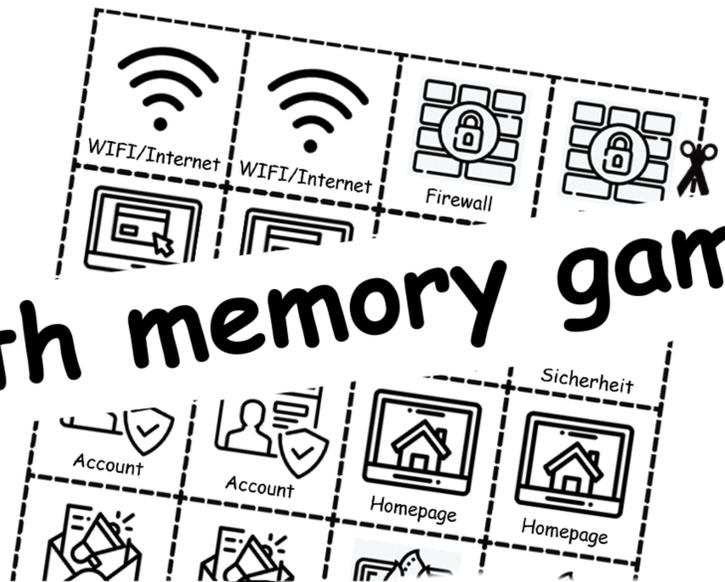

Spring-  
Special

All online! Everybody secure? Easy as pie!

funny colouring pictures,  
funny stories  
and delicious recipes  
all about  
cyber security

with memory game

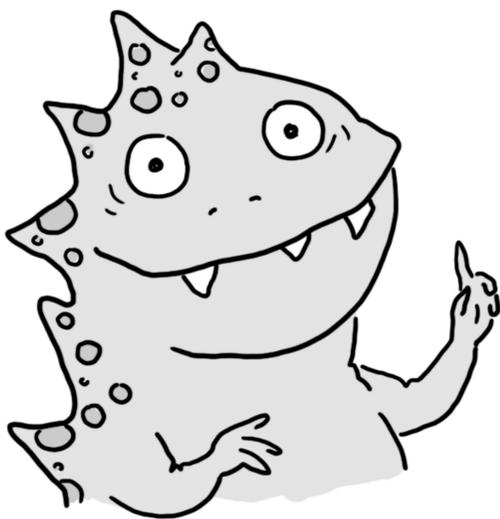

„Hey, there's Mama's tablet! Come on, let's play a prank on dad and send him a prank e-mail. It'll be fun!"

„Oh, yes! I know Mom's password, too. I peeked over her shoulder the other day."

„Mom got a new e-mail. It says: "Congratulations, you have won."

„Great! Click on it!"

„Stop kids! Don't click!"

"Who are you?"

„My name is AwareNessi!

I protect children from dangers in the Internet. . Bad people sometimes send harmful viruses for the computer. If you do not know the sender, do not click on the link in the mail!"

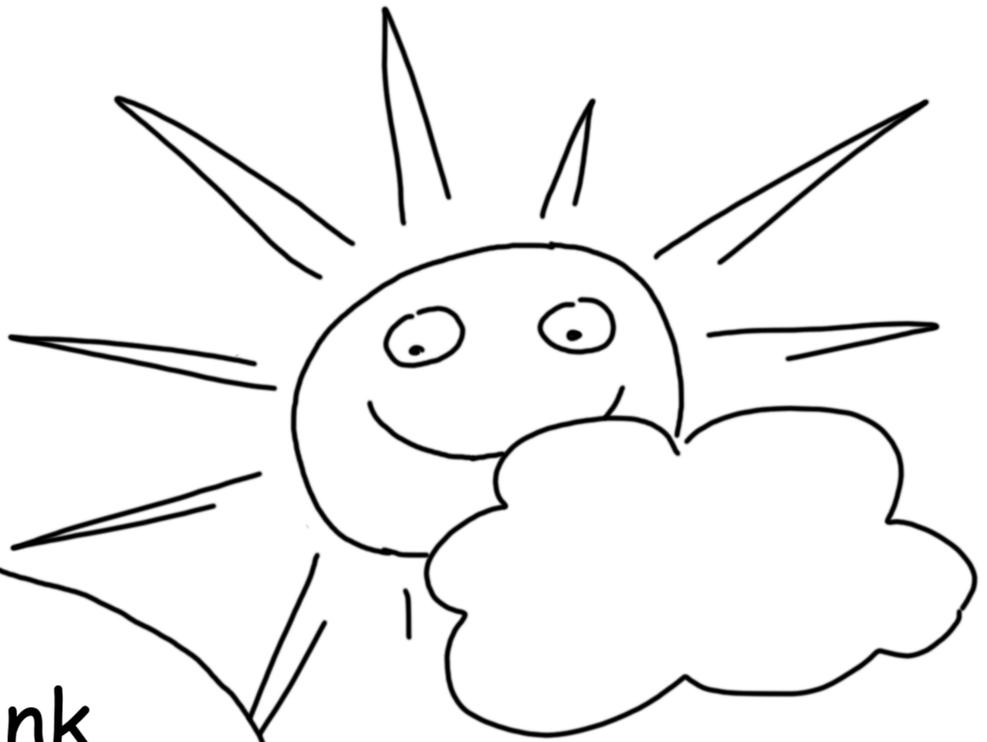

„Phew, that went well again! Thanks for saving us, dear AwareNessi!"

„The Internet is an exciting place! Playing, learning, meeting friends - everything is possible!

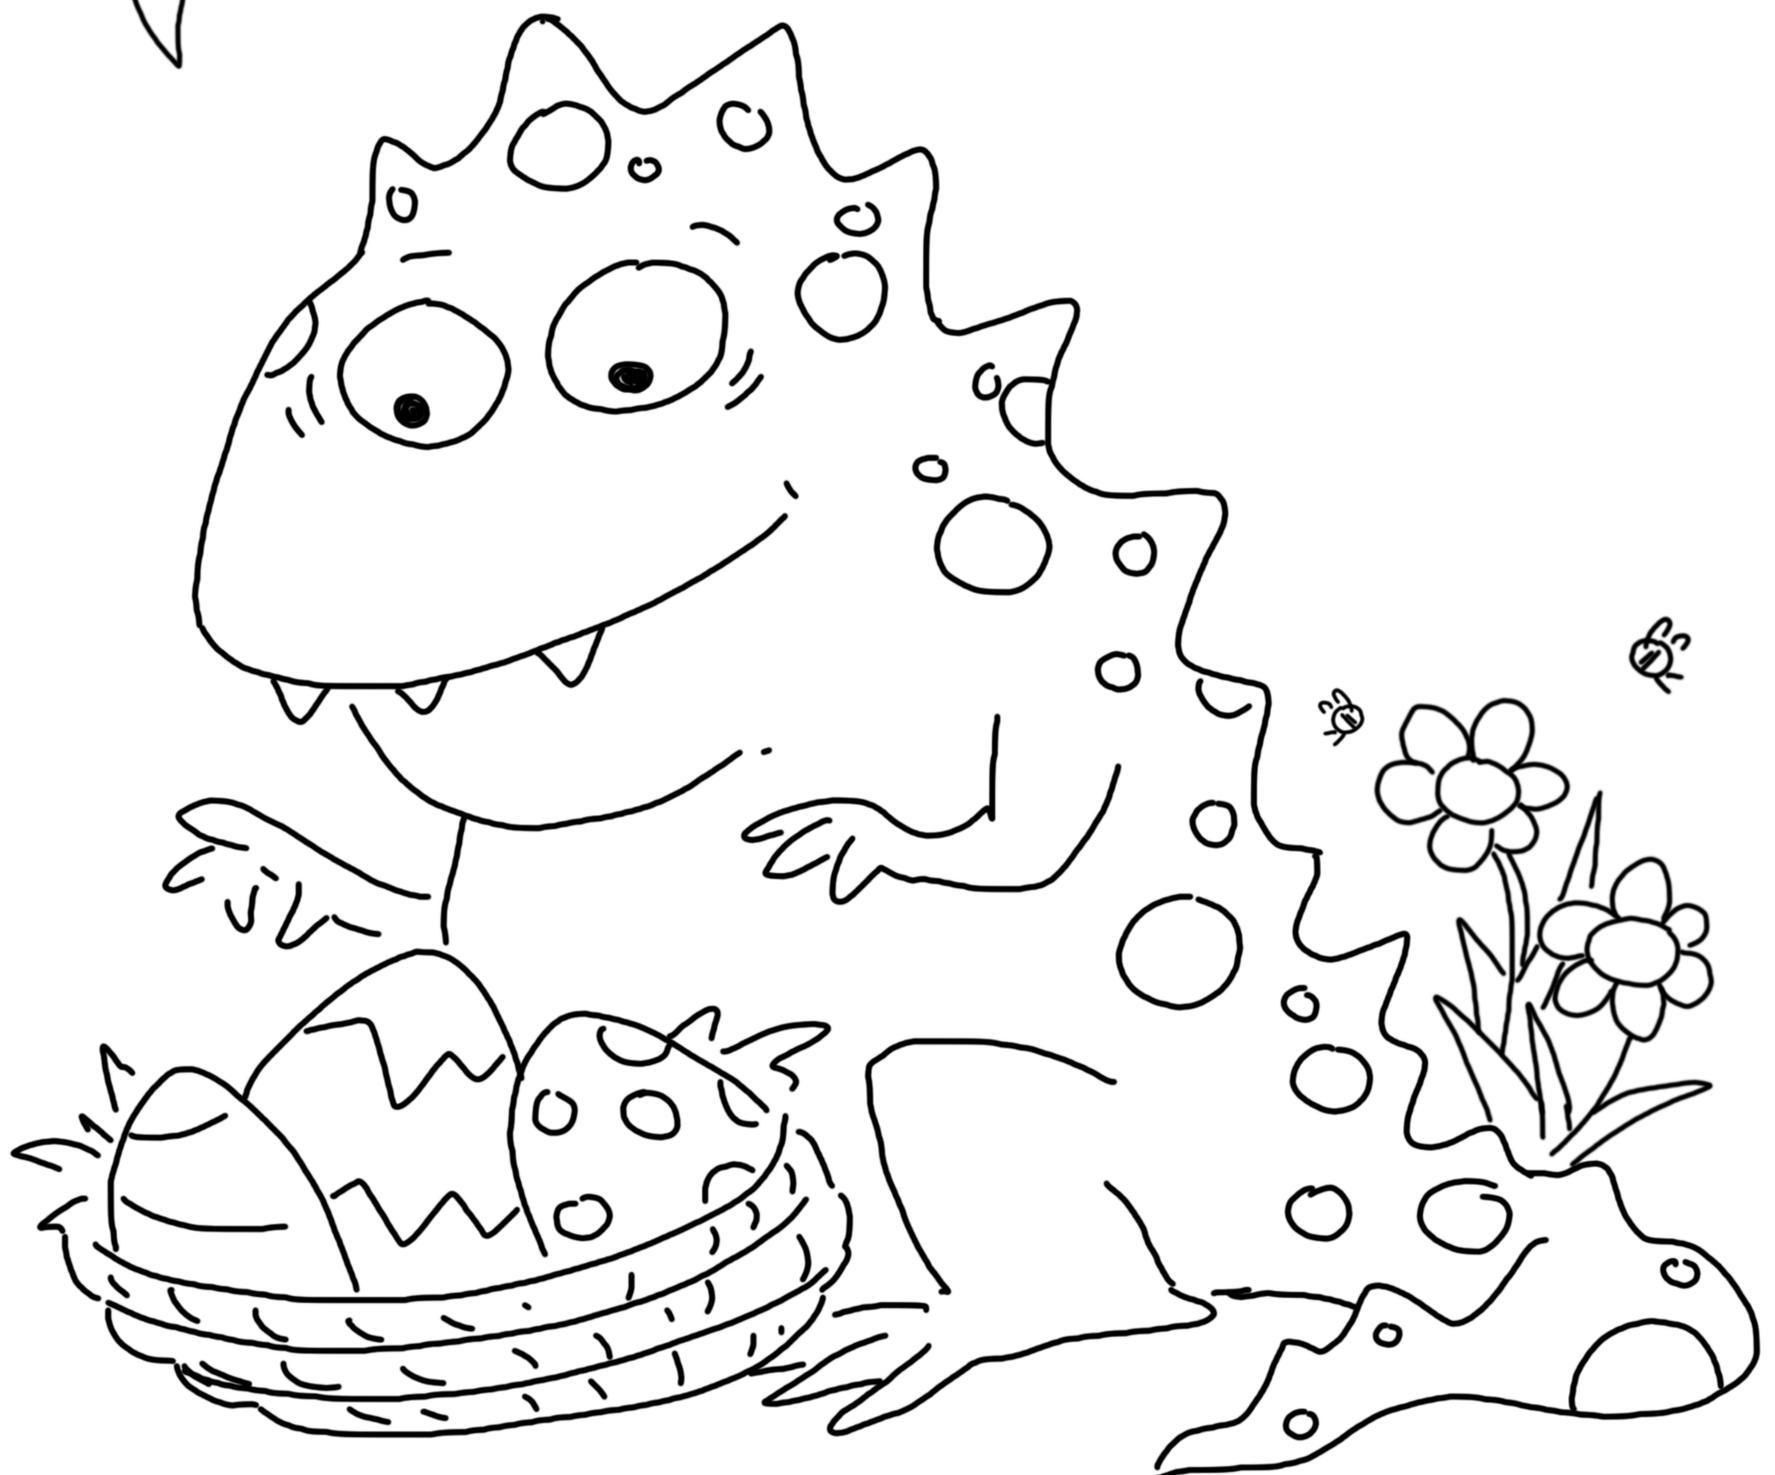

But there are also thieves around. Therefore, you have to be careful! Talk to your parents if you feel insecure or uncomfortable!

But now have fun with our puzzles, colouring pictures and games!"

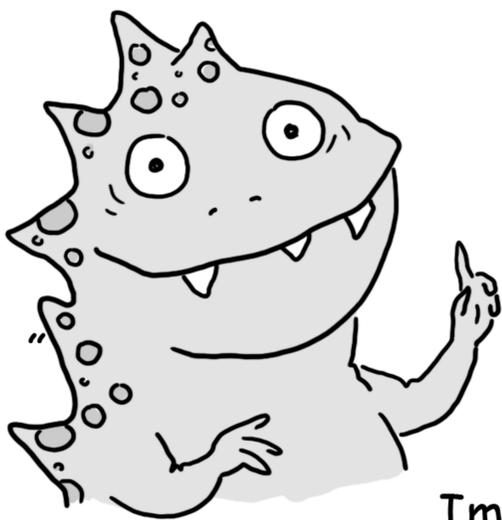

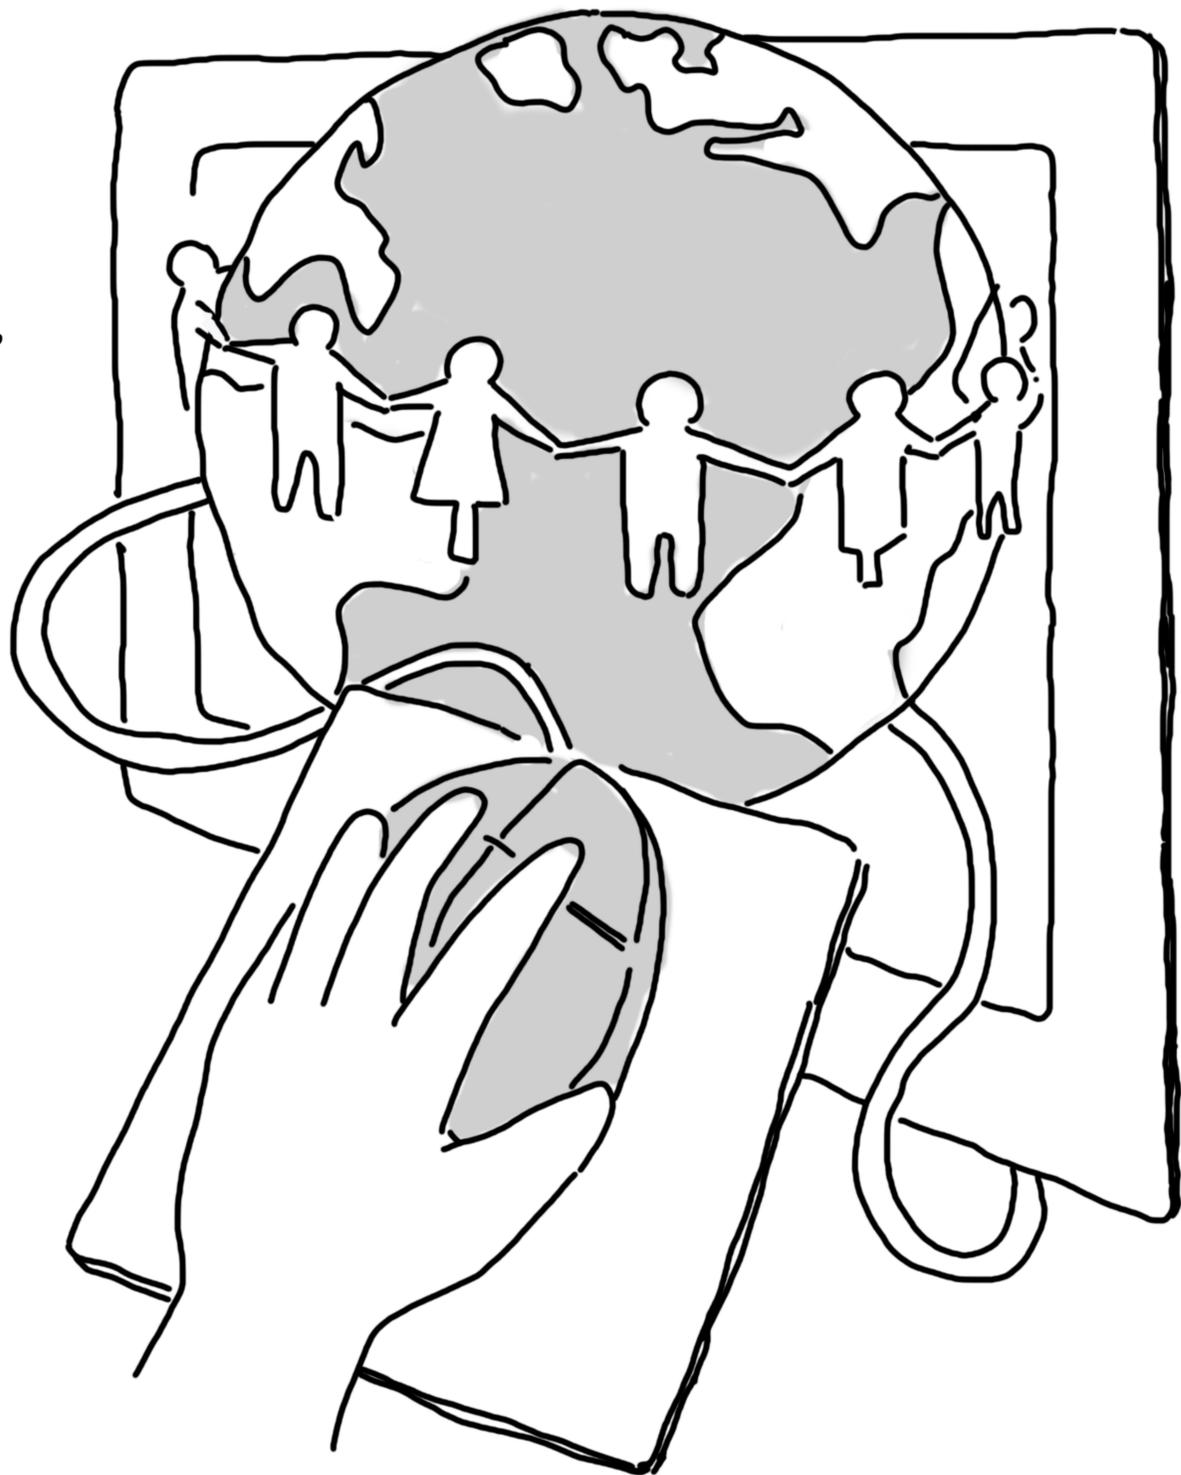

How do you think  
I look in other colors?  
Just try it!

## What is the Internet?

„Play games, watch movies, meet friends...  
There's so much possible on the internet!  
But how does it work?

Imagine that all computers around the world are connected with many cables. Everywhere in this worldwide web, there are countless, sometimes very large computers without a screen. All the films, e-mails, internet pages - and whatever else you can find on the internet - are stored on them. The great thing is that anyone can surf there with their tablet or mobile phone and watch everything. You just have to type the right address (URL) into your computer first.  
That's how people all over the world are connected!“

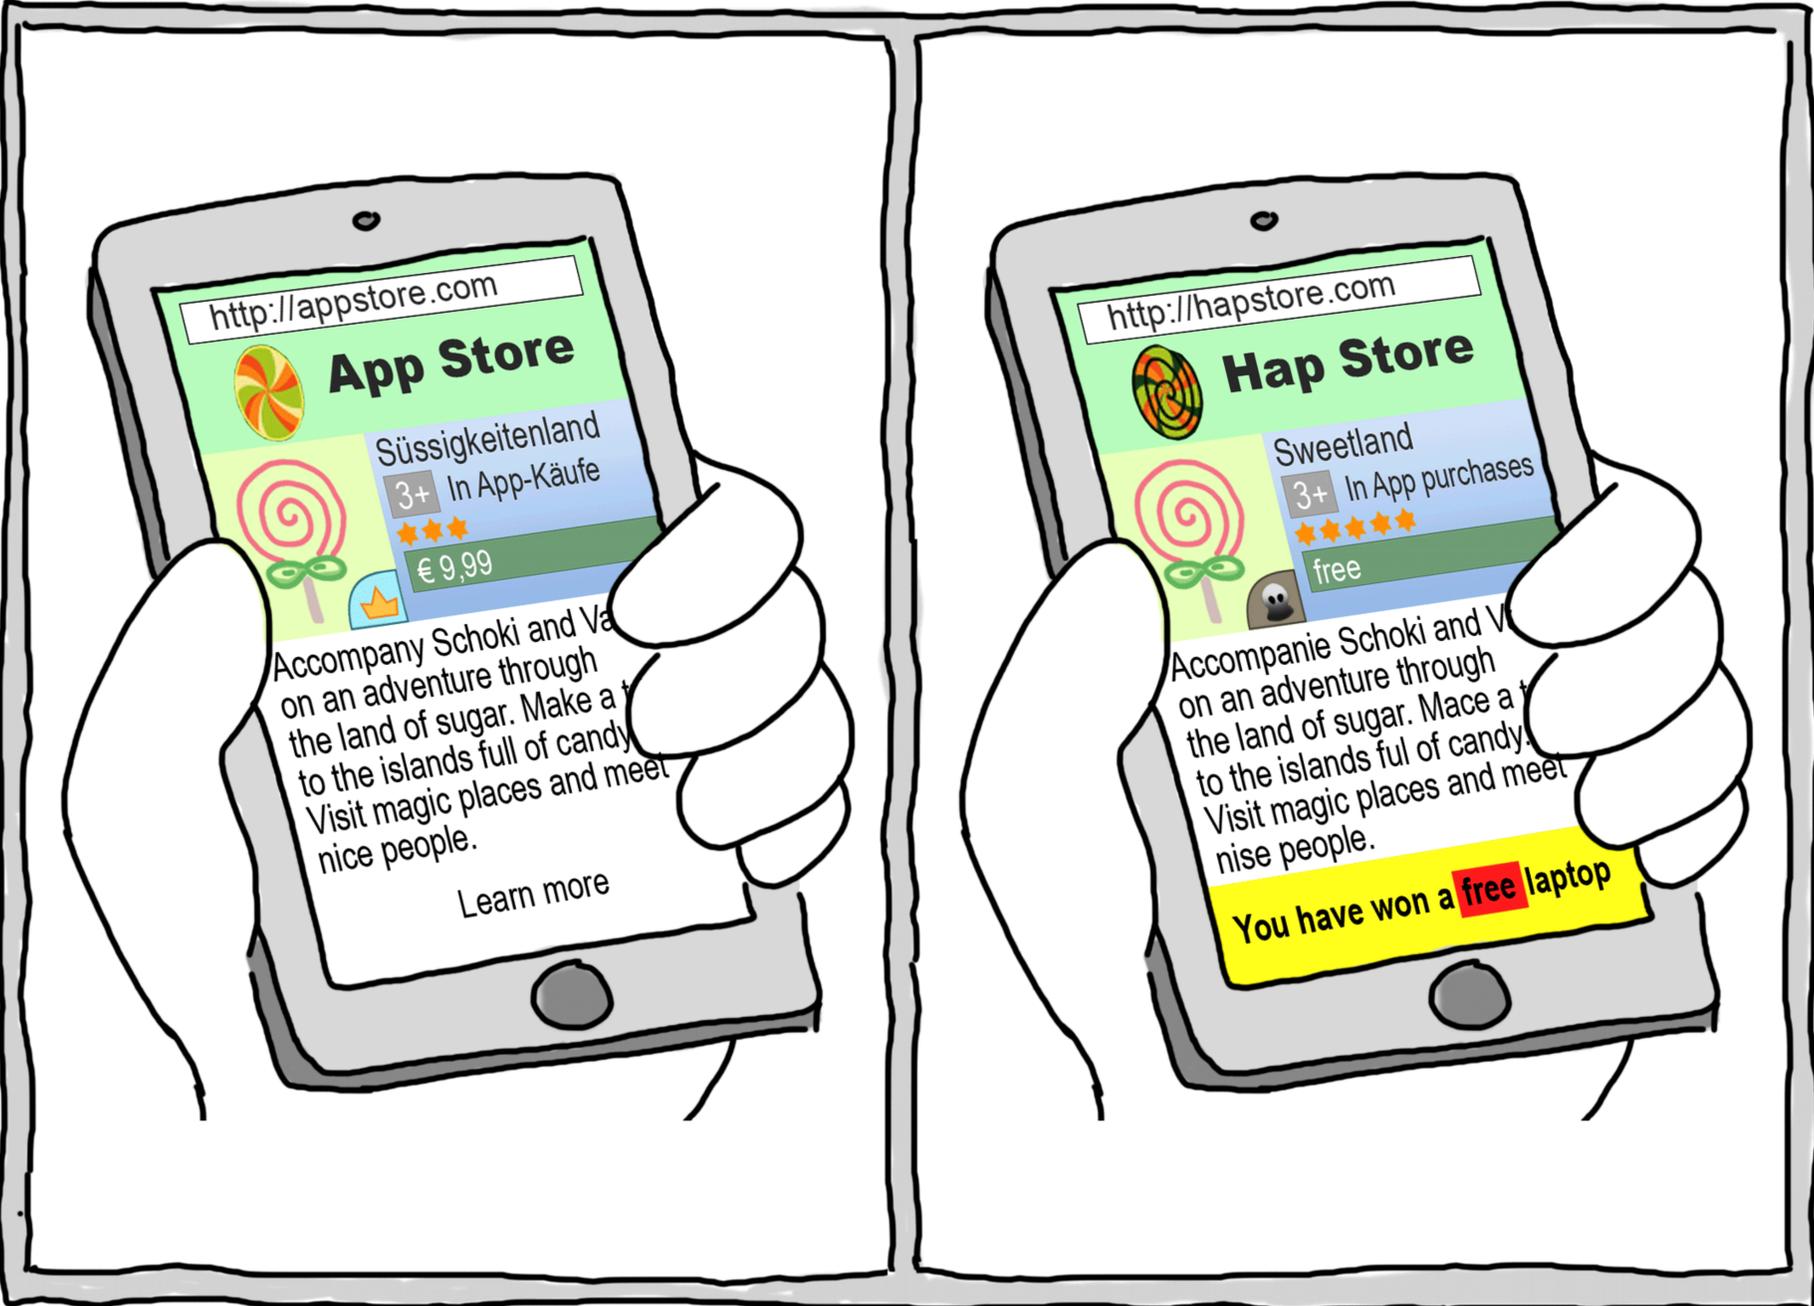

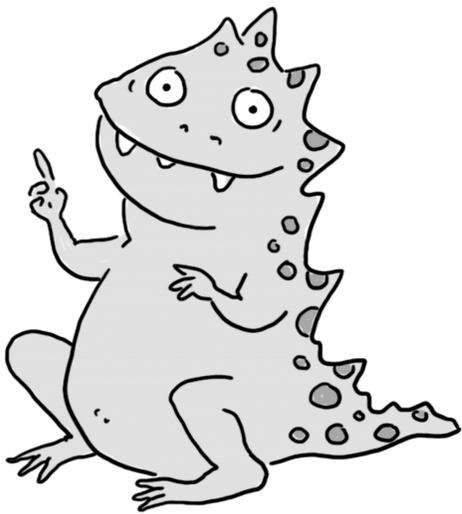

Only for clever  
word detectives: Circle the  
searched terms in the  
jumble of letters!

Now it gets tricky:  
Can you find all 8 errors  
on the right mobile  
phone screen?

**Golden Dragon's Wisdom:**  
Look carefully before you click or tap anything.  
. Sometimes things look familiar.  
But it could also be a well camouflaged trap!

# What is a password?

„Why can't you just steal Mom's phone and sneak out? Well, because her smartphone is of course protected by a password.

You need these secret passwords wherever you need to log on to the Internet. For example, if you want to rent a movie or transfer money from your dad's bank account.

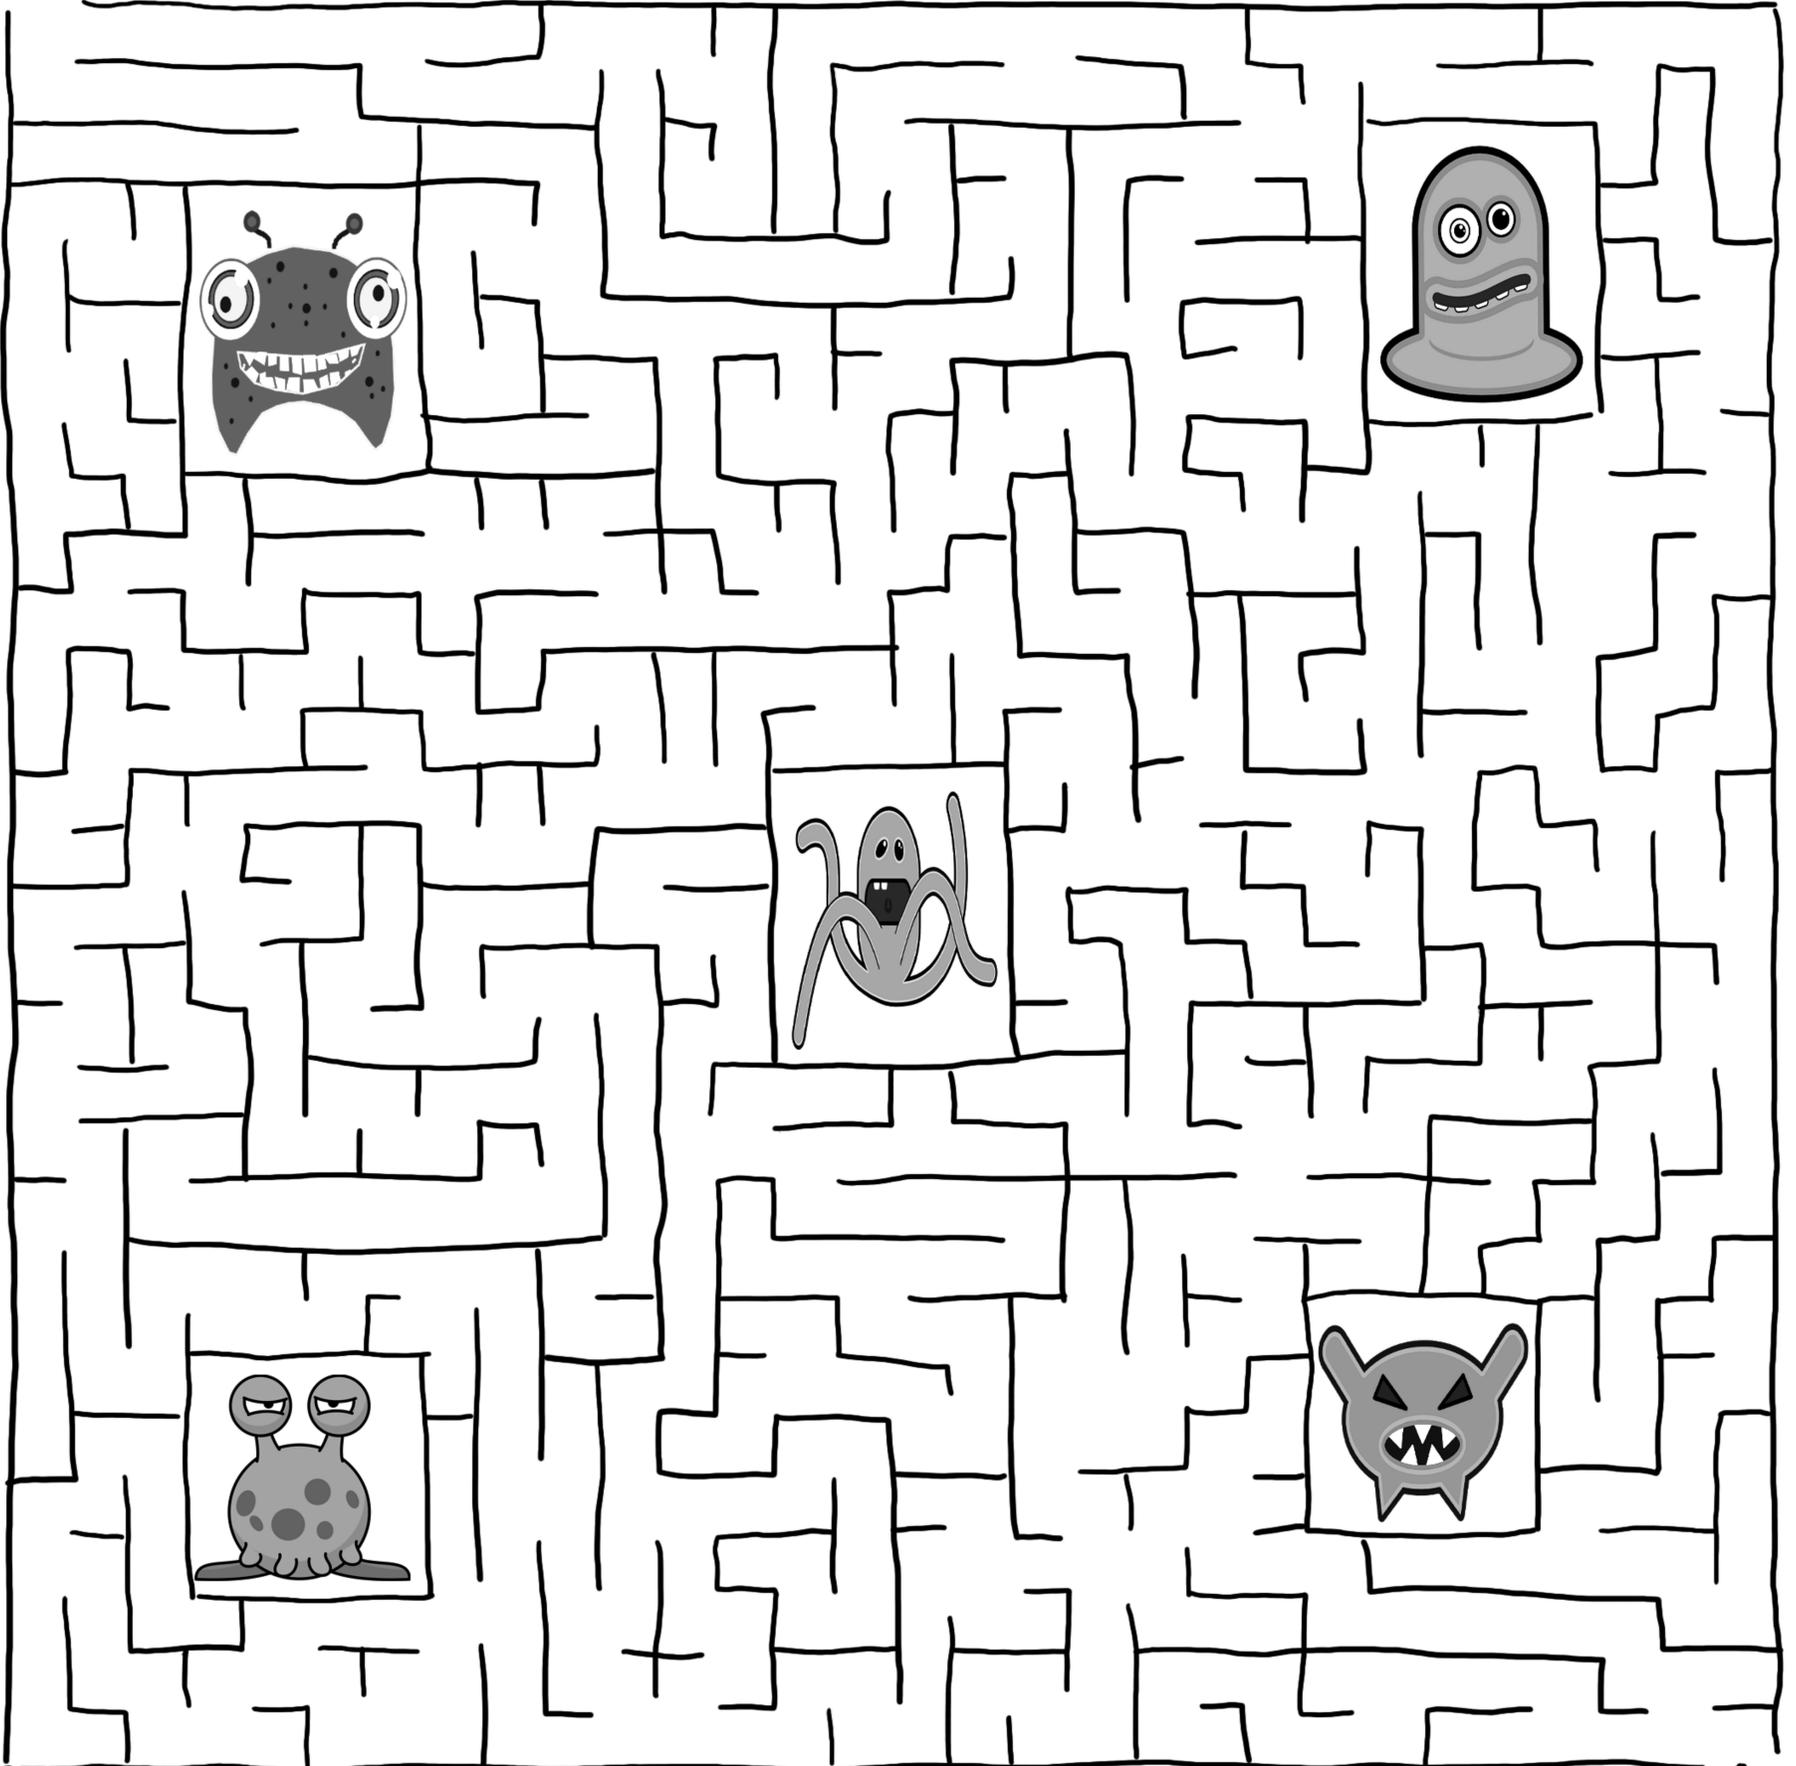

Stupid: Thieves keep trying to steal passwords.

That's why it's super important that they remain absolutely secret and can't be easily guessed.”

Difficult, difficult:  
Finding the right password  
is not easy at all!  
Not even in our labyrinth.  
But you can do it -  
let's go!

Start

Iconquelle: Pixabay

Finish

**Golden dragon wisdoms:**

- Don't use one password for several internet pages
- you should be able to remember your password
- but thieves must not be able to guess it

Smart are those who can remember their passwords, sure. But what about you? Test yourself with our memory game. Just colour it, cut out - and play!

Funny face painting  
Take  
- hard boiled eggs  
- felt-tip pens or marker pen - in all possible colours  
- lots of imagination

**Golden Dragon Wisdom:**  
It's easy for thieves to put on a friendly face.  
It's even easier to fall for it.

Now a task  
for the whole family:  
Bake a Cyber Kitchen  
Easter recipe  
together

## INGREDIENTS:

- 120 g of lean or soft butter
- 100 g of sugar
- 2 eggs
- 250 g of flour
- 1 packet of vanilla sugar
- 1 packet of vanilla custard powder
- 1 pinch of salt
- 3 tablespoons of baking powder
- 100 ml of milk

## For decoration:

- 1 packet of fondant (for the mask)
- chocolate drops
- icing sugar
- 2 tablespoons of milk

## THE PREPARATION:

1. preheat the oven to 160 degrees Line two baking trays with baking paper.
2. beat the butter with the sugar until foamy, add the eggs one by one. Mix flour with pudding powder or starch, baking powder and salt. Stir in alternately with the milk.  
Attention: The dough should not be too soft!!
3. fill dough into a piping bag without spout and squirt small heaps onto two trays - either about 20 small or 10 large ones.  
Leave enough space between them. Alternatively use 2 spoons.
4. bake the cakes for about 12 minutes (for small ones) or 15-20 minutes (for larger ones) until light brown.  
Let cool and decorate the smooth side in the next step.
5. chocolate drops and 200 g sieved icing sugar mixed with 1-2 tablespoons of milk are suitable for icing. Cut the fondant into small rectangles for the mask. Of course there are no limits to creativity!
6. enjoy!
